

PETERBOROUGH GARDEN PARK

Environment

We are committed to doing our bit for the environment. We will:

- Investigate on-site energy generation.
- Build to at least BREEAM very good standards - where we will be assessed on the sustainability of our building by the Building Research Establishment.
- Install rain-water harvesting as standard.
- Support Peterborough's ambition to become the UK's Environment Capital.
- Work with the Council's Travelchoice team and local bus operators to explore ways to improve accessibility of the site by public transport, by cycle and by foot.
- The Millennium Green Wheel cycle route is on our doorstep and our Cycle Hub will help make it more accessible to people.

Peterborough Garden Park is well connected to local bus routes and we are working to make further improvements.
